## THE TAG2000 INTERNATIONAL LLC HOLDINGS COMPANY CELEBRATES TENTH YEAR OF SERVICE TO THE COMMUNITY

ROCKY HILL, CT – October 22, 2005 – The TAG2000 International LLC Holdings Company will commence its year of celebration of TAG 10 – The 10<sup>th</sup> year of Service: TAG Year 2005-2006! From our humble beginnings as a computer club back in 1996 to the Holdings Corporation as we know it today, our business has surely grown beyond anyone could imagine. Many people have said it was impossible. Many people have said we should stop the company. Many people teased the founder and other members of this company all through their lived in public school, and even within the founder's ethnic community! However, the company stands today as a testament to the hard work of the people who have been involved with it over the years. Furthermore, the Holdings Company is set to declare a profit and pay out dividends to its partners, pending finalization of this latest contract.

Founder Alan C. Tan and his business partners should be proud of the corporation they have created. Today, the business has just landed a big contract to provide hosting services, software support and development, and web site design to a group of major real estate developers, the first project established outside the group of businesses owned or controlled by the parents of the partners. From starting a computer club to help others in 1996, to the invention of the TAGGER SubOperating System/Tempulator API (known as the Alan API 12 Series now) Common Language Runtime and Common Systems/Management Systems, to marketing that product to large corporations, the corporation has come a long way. The product originally marketed to large corporations were rejected, later to notice that four CMS products (Microsoft .NET, J2EE, Oracle CMS, and IBM WebSphere) using the idea came out two to three years later after the letter was sent and some legal notices were sent back to our company's leaders, which shows that the products created by this holdings corporation's personnel and subsidiaries are viable products.

The TAG2000 International LLC Holdings Company celebrates the end of TAG 9 and the 9<sup>th</sup> Anniversary of the TAG2000 International LLC Holdings Company during November 21, 2005 to November 30, 2005. It has been a long nine years for the holdings company, and the corporation has come quite far from its humble beginnings. Currently, a celebration of 10 years of TAG by Founder Alan C. Tan and his partners is scheduled for the corporation's annual meeting of the Board of Directors and the Holdings Corporation Advisory Board in January 2006.

## ABOUT THE TAG2000 INTERNATIONAL LLC HOLDINGS COMPANY

The TAG2000 International LLC Holdings Company is a science and technology holdings company founded in November 1996 by founder Alan C. Tan in the mission to help others with their computers. Today, the Company provides a full suite of Internet and Information Technology services to small businesses at a reasonable price.
